

Research assistant/Field technician

The Unit for Field-based Forest Research

The Unit for Field-based Forest Research (www.slu.se/en/departments/field-based-forest-research) at the Swedish University of Agricultural Sciences (SLU)/ Faculty of Forest Sciences, is hiring an experienced technician in the area of environmental field measurements. Working within a team of Research Engineers and Technicians at the Svartberget Field station, offers a great opportunity for those who enjoy working outdoors, and making a positive contribution to boreal ecosystem research

SLU contributes to three geographically distributed research infrastructures; ICOS Sweden (Integrated Carbon Observation System; www.icos-sweden.se), focusing on monitoring and understanding the greenhouse gas balance; ACTRIS Sweden (Aerosol, Clouds and Trace Gases Research Infrastructure) (www.actris.eu) and the national SITES (Swedish Infrastructure for Ecosystem Science; www.fieldsites.se). The research infrastructures include extensive automated and manual measuring programs aiming to understand the ecology, biogeochemistry, land-atmosphere exchange and management of boreal ecosystems and the impact of climate change. The Experimental forests also hosts numerous additional national and international research projects collaborating with academics and students.

Duties:

- The main tasks include the maintenance of the field research infrastructures measuring programs both on the ground and in instrumented towers.
- Daily duties include field maintenance, troubleshooting, calibration of field equipment, programming data loggers, multiplexers etc
- In addition, you will also be involved in the direct support of ongoing research projects.

Qualifications:

- Knowledge and experience of field work with meteorological sensors, gas analyzers and data loggers.
- Ability to adapt to flexible work schedules and to teamwork with a common goal.
- Ability to work on multiple assignments, set priorities, reprioritize when necessary, and take initiative in defining and executing tasks.
- Driver's license for cars, valid in Sweden.
- Fluent in written and spoken English and prepared to learn Swedish.
- Ability to perform work tasks in high towers (150m) in accordance with safety regulations. Training will be provided where necessary.

Qualifications considered a merit:

- Master degree, or comparable, in engineering, physics, or environmental science or related field experience.
- Experience with eddy covariance measurements/micrometeorological theory.
- Handling and repair of scientific equipment in laboratory or in the field.
- Experience in the development and fabrication of scientific equipment and supporting infrastructure.
- Familiarity with or experience in an academic research environment.
- Ability to program data loggers and process data with scripted language, like Matlab, R. or similar softwares.
- Experience of GIS data and related software, for example QGIS
- Certified drone pilot with experience in drone flying and image analysis
- Driver's license for snow mobiles and experience of snow mobile driving

Place of work:

The position is based at Svartberget field station, located about 70 km (one hour drive) from the SLU Forest Faculty in Umeå.

Form of employment:

Permanent employment. SLU uses probationary employment.

Extent:

100%

Starting date:

1 July or According to agreement.

Application:

We welcome your application no later than 2022-06-28, use the button below.

The Swedish University of Agricultural Sciences (SLU) is a world-class international university with research, education and environmental assessment within the sciences for sustainable life. Its principal sites are in Alnarp, Umeå and Uppsala, but activities are also conducted at research stations, experimental parks and educational establishments throughout Sweden. We bring together people who have different perspectives, but they all have one and the same goal: to create the best conditions for a sustainable, thriving and better world. SLU has just over 3,000 employees, 5,000 students and a turnover of SEK 3 billion. The university has invested heavily in a modern, attractive environment on its campuses. www.slu.se
